

## Snail's Eye View

Hold the camera **low** to look **along an object**.

**Imagine you were a snail slithering along the ground.**

## Possum's Eye View

Hold the camera **low** and against an object **looking upwards**. This can make the object look huge.

**Imagine you were a possum looking up a tree.**

## Giant's Eye View

Hold the camera **above** the object **looking down**. This makes objects look small or weak.

**Imagine you were a towering giant looking down at the ground.**

## Eye Level View

Hold the camera straight at the **same level as your eyes**.

**Take the photo as you see it from your level. Be careful not to tilt the camera.**

### Tips when using the camera on iPad:

1. Remember to tuck in your 'chicken wings' (elbows), this will help keep the iPad still.
2. Remember you can change the brightness of your photo by tapping the screen and scrolling the little yellow sun up or down.
3. Remember you can zoom in on your subject by sliding 2 fingers in and out across your screen.
